

Artificial intelligence in data science

Pre-trained networks

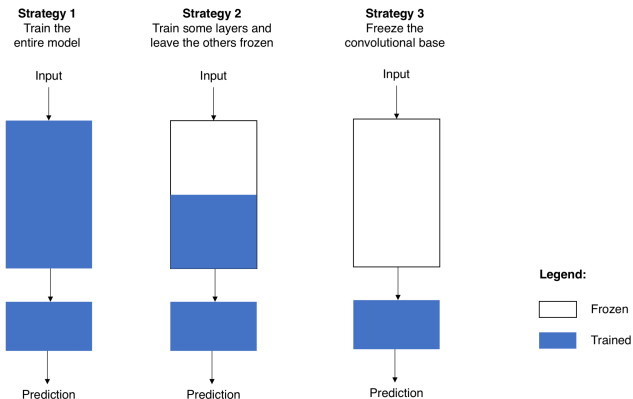

Janos Török

Department of Theoretical Physics

October 18, 2023

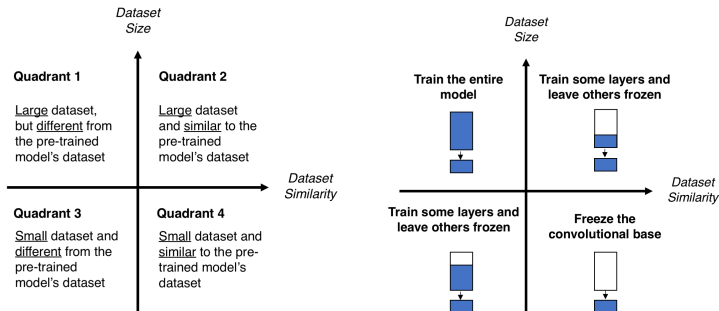

Why use pre-trained models?

- ▶ Real good data with reasonable sized images and many categories takes ages on big computer farms
- ▶ The data is similar to the previous one → gain time
- ▶ Strategies

Why use pre-trained models?

► Strategies

Visualization of different layers

- ▶ Algorithm:
- ▶ Use the optimization algorithm of tensorflow and maximize the outcome of one class
- ▶ We end up with images which will be 100% in one category
- ▶ How they look like?

Visualization of different layers

conv1_1: a few of the 64 filters

conv2_1: a few of the 128 filters

Visualization of different layers

conv4_1: a few of the 512 filters

conv5_1: a few of the 512 filters

Visualization of different layers
